

**WISMEC™**

**Amor Plus**

Quick Guide

**Amor Plus Overview**

**Vaping**

Before vaping, please rotate the top regulating ring to the position as shown

Note: The e-liquid inlet can be regulated by rotating the ring in a proper range, but make sure that the filling holes are closed when vaping.

**Liquid Filling**

Rotate the ring at the top of regulating component to expose the fill hole and then slowly fill the e-liquid into the glass tube. After filling the liquid, rotate the ring again to close the fill hole.

**Note:**

1. Please drip a few drops of e-juice into the atomizer head before the first use.
2. Air-inlet holes should be closed during filling.
3. Make sure the e-liquid level is between 10%-90%.
